DETAILED ACTION

Applicant has responded to the restriction requirement of 13 January 2005 by amending claim 21 to render to reasoning in that paper moot. The requirement for election of 13 January 2005 is therefore withdrawn. A new requirement is entered below.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-20, 23-24, drawn to a qubit circuit, classified in class 257, subclass 31.
- II. Claims 21-22, drawn to a method of forming a qubit, classified in class 438, subclass 2.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the device claims could be made by a method that involves forming first and second coils that are close enough to the main loop and the subloop to couple flux, but not adjacent, as required by the method claims.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
